ISA Transactions 33 (1994) 429–431

ISA TRANSACTIONS®

Author index of volume 33

Alawadi, H.A., B.C. Johnson and D. Schlameus, Predicting and understanding thermal performance in today's instrument loops 313–325
Andersson, B.-O., *see* Mejdell, T. 27– 34
Annarummo, C., *see* Gigesi, D. 61– 72

Beauford, M.H., *see* Riggs, J.B. 141–146
Beckman, R.F., *see* Gidwani, K.K. 217–225
Bhullar, R.S., *see* Boyette, P. 197–205
Bich, W. and P. Tavella, Calibrations by comparison in metrology: A survey 391–399
Borders, G.T., *see* McMillan, G.K. 35– 41
Boyette, P. and R.S. Bhullar, Challenges of tomorrow for the control systems professional 197–205
Bukowski, J.V. and W.M. Goble, Effects of maintenance policies on MTTF of dangerous failures in programmable electronic controllers 185–193
Burrows, J., *see* Peck, J.P. 159–164

Campos, M.C.M.M., *see* Freitas, M.S. 19– 25
Cao, L.S., *see* Hang, C.C. 147–151
Chen, J., J. Tornberg, J. Kivimaa and M. Karras, Automatic industrial cross-correlator for flow measurement 171–179
Chien, I-L., *see* Fruehauf, P.S. 43– 59
Cole, J.D. and K.B. Yount, Applications of dynamic simulation to industrial control problems 11– 18
Coleman, H.W., *see* Steele, W.G. 339–352
Colwell, L.W., *see* Yiu, Y. 133–140
Cox, M.G., A classification of mathematical software for metrology 383–389

deSpautz, J., Quantifying the benefits of automation 107–112
Deuel, A.C., The benefits of a manufacturing execution system for plantwide automation 113–124

Fan, Y., *see* Yiu, Y. 133–140
Ferguson, R.A., *see* Steele, W.G. 339–351
Freitas, M.S., M.C.M.M. Campos and E.L. Lima, Dual composition control of a debutanizer column 19– 25
Frenkel, R.B., Performance of standards: intercomparison, treatment of correlations, detection of laboratory offsets and outliers, and long-term assessment of an ensemble of standards 401–409
Froisy, J.B., Model predictive control: Past, present and future 235–243
Fruehauf, P.S., I-L. Chien and M.D. Lauritsen, Simplified IMC-PID tuning rules 43– 59

Gibson, I.H., Variable-speed drives as flow control elements 165–169
Gidwani, K.K. and R.F. Beckman, Evaluation of refinery control systems 217–225
Ginesi, D. and C. Annarummo, Application and installation guidelines for volumetric and mass flowmeters 61– 72
Goble, W.M., *see* Bukowski, J.V. 185–193
Gruber, M.K., Use of structured design and development in the validation of application software 125–131

Hang, C.C., W.K. Ho and L.S. Cao, A comparison of two design methods for PID controllers 147–151
Hemp, J., *see* Zhang, X.-z. 181–184
Hill, R.C., Strategy and implementation of an information infrastructure to support contemporary management practices 207–216
Ho, W.K., *see* Hang, C.C. 147–151

Jethra, R., Viscosity measurement 307–312
Johnson, B.C., *see* Alawadi, H.A. 313–325
Jutan, A., *see* Nakano, E. 353–366

Karras, M., *see* Chen, J. 171–179
Kivimaa, J., *see* Chen, J. 171–179
Kjaer, A., M. Waller and P. Wellstead, Headbox modelling for cross-direction basis weight control 245–254
Klopfenstein, Jr., L.R., Software linearization techniques for thermocouples, thermistors, and RTDs 293–305
Klopfenstein, Jr., R., Personal computer process loop simulator 255–274

Lauritsen, M.D., *see* Fruehauf, P.S. 43– 59
Lima, E.L., *see* Freitas, M.S. 19– 25
Longwell, E.J., Dynamic modeling for process control and operability 3– 10
Lyons, C.J., *see* Robbins, S.J. 377–380

Manukian, N., J. Neuhaus and G. Wilensky, Multi-parameter process prediction with neural networks 329–338
McMillan, G.K., W.K. Wojsznis and G.T. Borders, Flexible gain scheduler 35– 41
Mejdell, T. and B.-O. Andersson, Using temperature profile for product quality estimation on a distillation column 27– 34
Mockel, W.D., *seee* Robbins, S.J. 377–380

Nakano, E. and A. Jutan, Application of response surface methodology in controller fine-tuning 353–366
Neuhaus, J., *see* Manukian, N. 329–338
Ng, K.W., Control valve noise 275–286

Ottino, C., Windows usage in a plant automation system 227–233

Papadopoulos, M.N., *see* Yiu, Y. 133–140
Paques, J.-J., Limit switches: Selection for safety 99–103
Pavese, F., Foreword 381–382
Peck, J.P. and J. Burrows, On-line condition monitoring of rotating equipment using neural networks 159–164

Rammler, R. Considerations for advanced centrifugal compressor control 153–157
Richter, D., Software quality assurance in metrology 421–428
Riggs, J.B., M.H. Beauford and J.C. Watts, Model-based control using mechanistic, nonlinear models 141–146
Robbins, S.J., W.D. Mockel and C.J. Lyons, Average molecular weight determination of a polyester by NIR spectroscopy 377–380
Rosenberg, R.J., Temperature measurement on the job site using RTDs and thermocouples 287–292

Sakmar, M.W., *see* Sharpless, S.L. 367–375
Schlameus, D., *see* Alawadi, H.A. 313–325
Sharpless, S.L., R.J. Winslow and M.W. Sakmar, An object oriented approach to batch programming 367–375
Splett, J.D., *see* Vecchia, D.F. 411–420
Steele, W.G., R.A. Ferguson, R.P. Taylor and H.W. Coleman, Comparison of ANSI/ASME and ISO models for calculation of uncertainty 339–352

Tavella, P., *see* Bich, W. 391–399
Taylor, R.P., *see* Steele, W.G. 339–352
Thurston, C.W., Programmable electronic systems applied for risk control in petrochemical plants 83– 97
Tornberg, J., *see* Chen, J. 171–179

Vecchia, D.F. and J.D. Splett, Outlier-resistant methods for estimation and model fitting 411–420
Verhappen, I., The effects of 'winterizing' pH buffers 73– 82

Waller, M., *see* Kjaer, A. 245–254
Watts, J.C., *see* Riggs, J.B. 141–146
Wellstead, P., *see* Kjaer, A. 245–254
Wilensky, G., *see* Manukian, N. 329–338
Winslow, R.J., *see* Sharpless, S.L. 367–375
Wojsznis, W.K., *see* McMillan, G.K. 35– 41
